WIFE OF THE PRESIDENT.

ssassin, and that, too, while she seemed standing on the threshold of one of the most glorious with a shotgun, we are not prepared to say. futures known to her sex on this wide Continent. There is another reason why Bismack Although dire the calamity which has just be- should be sent to Washington. It is probafallen her and the Nation, and though terrible bly, because the German Government the ordeal through which she is now passing, is satisfied that he, having disthey do not involve all her claims upon our sym- graced pathy. As a noble and self-sac rificing wife, a ally, would have more influence tond and affectionate mother, and a kind and unwavering friend, she stands out in bold relief also, eliciting that untergned admiration and

ble farmer who had sufficient means to afford her naternal culture and care to which some of even mate to her noble partner in one or two relations and unfailing clear-sighteeness. Obviously, therefore, they were as one in all that was estherefore, they were as one in all that was essential to human happiness; and hence the ever-deepening love and affection which has characterized their lives up to the present hour.

It will not, then, be difficult to conceive of her dismay and anguish when, on Saturday the 2d day of this current month, the intelligence reached her at Elberton, N. J., that the President her husband, was wounded, but "not danger ously," by an assassin while entering the depot of the Baltimore and Potomac Railroad at Washington. A few moments previously, delicate as was

ton. A few moments previously, delicate as was her health, her face had been radiant with joy; for on that fay she was to have joined the President with their children in New York, and proceed thence with him and some gentlemen of high official position, to pay a visit to several points of interest East, and make a voyage along the coast of Maine as far as Mount Desert Island. In an instant the cup was dashed from her lips, and notwithstanding that the telegram conveying the dire intelligence was couched in language the dire intelligence was couched in language the most cautious and considerate, yet, with an instinct not to be baffled by the guarded expressions of friends, she felt that some frightful calamity had befallen her and her family; and instantly flew on the wings of affection to the bedside of the illustrious sufferer. The journey, although performed with almost the speed of the wind, was to her all but interminable; yet it came to a close, and at last she found herself bending in agony filled with despair over the sharer of her early joys and sorrows, now the Chief Executive of one of the mightiest Nations on earth. From that one of the mightiest Nations on earth. From that hour the subtle influence of her voice and presence seems to have supplemented the wondrous alchemy of the physicians in attendance which had already wrought miracles. There is no dehad already wrought miracles. There is no denying it, there are anodynes beyond the scope of mere physics, and which transcend all the critical acumen of the most profound medical skill. And although no metaphisical power can perform "a physical impossibility," or "set to a leg or an arm," as Falstaff has it, yet there is, as alleged, that about it which sometimes enables us to bear the loss of the one or the other, and which possibly prevents any fatal result from the deprivation we have suffered.

Let us hope then, that, in the case of the President, the undoubted medical and surgical skill of the distinguished gentlemen who now watch so faithfully and ably over his life, may be supplemented to the happiest consummation by the

mented to the happiest consummation by the mysterious magnetic influences born of the love and affection of his tender and loyal wife, as well as of the prayers and sympathy of all civilized peoples. Surely such truth and loyalty as hers peoples. Surely such truth and loyalty as hers should be crowned by the restoration to health and strength of him who is so worthy of her, and who has struggled so long and so bravely in the very jaws of death. For now, after all this frightful alternation between bitter agony and tremb-

ling hope, it would be terrible in the last degree if the star of her life were extinguished forever, and the present meritorious efforts to cheer this hour of her darkness with whatever lustre gold may afford, be rendered less effective than we had all so ardently anticipated.

Washington Society.

[Washington Letter.]
It will be remembered that not so very ong ago. Count Herbert Bismarck, the most promising son of the great chancellor, ran off with the wife of a friend. Old man Bismarck was not particularly elated at the scandal, which caused the three historical hairs that still linger on the top of his otherwise bald head, to stand up with rage, like the quills of a fretful porcupine. He was mad. But he calmed down after a while, and it is now understood that the dead-lock has been broken, and father and son have become reconciled. In the meantime, the injured husband appears to have found out that he was not needed any more, so he sued for a divorce. As all the parties were highly connected, and possessed great local influence; and as young Bismarck had no previous wife of his own to get a divorce om, the injured husband was granted what

he asked for.

It is now stated on pretty good authority that young Bismarck is going to be married to the divorced wife of a triend. He will probably be appointed German Minister at Washington, and the happy couple will spend their official honeymoon at our National Capital. The reasons for this are National Capitai. The reasons for this are sundry and divorce, so to speak. In the first place young Bismarck, it is asserted can not stay in Berlin. Whether this is because the injured husband is prowling about peror William, probably, thinks that he would have considerable influence at a capiwould have considerable fandence at Hill, tal where such men as Conkling, Ben Hill, Cameron and old Christiancy have so much Cameron and Ca pure and the good who may have attained to high position in any relation whatever.

The only; for, from time to time, if report speaks to see what was the limited and truly, it was his habit in any circumstances of difficulty, to draw upon her intellectual resources and unfailing clear-sighteeness. Obviously, distinctly hear the animal breathing He ran for a "pick," and in a short time dug out poor old Joe, worn to a skeleton stand. The dog had dug himself toward an outlet, and would have got out, but was stopped by a root of a tree across the hole. The poor animal licked the man's hand to show his gratitude at being released, but had no strength to do more. He was taken to the keeper's house and fed sparingly at first. He soon recovwas thirteen days and thirteen nights under-ground, and during that time could not have

had a drop of water to drink, or anything to eat either, unless he devoured a rabbit, which is not likely. Some remarkable statistics with reference o New Zealand have been contributed to an English contemporary. In the single Province of Canterbury agriculture has developed in a iruly marvelous manner dur-ing a brief period. In 1876 the production of wheat there was 1,770,363 bushels; of oats, 2,888,683 bushels; of barley, 620,699 bushels, and of potatoes, 17,895 tons, the total acreage under cultivation being 152,-982. Last year the acreage had increased to 389,729, the product being 4,461,400 bushels of wheat, 7,776,275 of oats 1,124,281 of barley and 37,466 tons of potatoes. Similarly with regard to sheep raising. It is said that there are in New Zealand at this moment
